

Design Engineer (DE) Avionics / Electric and Equipment **m/w/d**

We are a successful EASA Part 21J company (EASA 21J.737) located in the beautiful Munich area, wanting a (Master) Compliance Verification Engineer (CVE) Avionic/Electric becoming part of our exciting team at the earliest convenience. No matter the gender – the main thing is that you suit our team.

YOUR KEY TASKS

- ✈ Conception and system design for the integration of avionics/electric systems
- ✈ Creating design data for the electrical system integration
- ✈ Creating Compliance Documents along with successful implementation of the EASA authorization

YOUR CHANCES

- ✈ Making part of a young company and a small team
- ✈ Possibility to directly influence your business environment
- ✈ Enhancing inter-divisional competences
- ✈ Career Path to Design Organisation Compliance Verification Engineer
- ✈ Attractive, performance-linked wages
- ✈ Home Office with flexible labour time management
- ✈ Cantine in house including financial contribution to the cost

REQUIREMENTS

- ✈ Degreed engineer aircraft construction or similar professional qualification with previous professional experience of at least 2 years in the avionic, electronic and aviation integration/development
- ✈ Very good skills about the use of modern CAD Wiring/Harness tools like Vesys (Mentor/Siemens) or equivalent as well as using MS Office tools for creating documents
- ✈ Fluent command of written and spoken English
- ✈ Knowledge of airworthiness requirements for aircrafts
- ✈ Ability to work independently, to find and define solutions quickly in consideration of technical besides economic aspects
- ✈ Likewise, the ability for good teamwork accompanied by corresponding communication skills
- ✈ Creativity regarding improvements and development of the business environment (productivity, customer service)
- ✈ Distinctive social skills combined with the ability to concentrate on several tasks and assertiveness

WHO WE ARE?

ALAMO Engineering is a young Engineering office and manufacturer in the Aviation Business. We are specialized on individual design solutions and upgrades for the aviation industry.

Next to our engineering and certification services we produce parts, kits and harness.

With a sharp Team we grow consistently and want to expand further.

Are you ready for exciting and new challenges?
